

Columbiana County partners begin vaccinating those 80 and older.

January 14, 2021

The Columbiana County COVID-19 Vaccination Task Force is happy to announce efforts to begin distribution of the COVID-19 vaccine in Columbiana County to those in Phase 1B of Ohio's Vaccination Distribution Plan. Transitioning into Phase 1B will be gradual, focusing on our most vulnerable population first, do the limited doses of vaccine available in the county and the large population in phase 1B.

Specifically, Columbiana County residents 80 years of age or older will be offered the COVID-19 vaccine beginning the week of January 19, 2021, at the locations listed below. This information will also be available on the Columbiana County Health District's website and by calling 211.

You may be asked to present a copy of your ID, insurance or Medicare B card when attending a vaccination clinic. However, all of these locations will administer the COVID-19 vaccine with no out-of-pocket cost.

Additional segments of the phase 1B population will be notified through our media partners of vaccine availability in the coming weeks. However, these dates and locations have yet to be determined and are dependent on receiving further vaccine from the state.
